

LK Studio

Application Brief

Multi-shop tailor platform for shops, customers, and admin

Production: <https://lk-studio-1.onrender.com>

Generated: 26 June 2026

How it works

End-to-end example

LK Studio Customer SaaS-style tailoring platform that connects tailor shops with customers across India. Each shop runs its own digital workspace — designs, orders, measurements, bills, and subscriptions — while customers browse catalogs, save family measurements, place stitching or repair orders, and track progress. A central admin manages the shared design catalog (Maggam, Blouse, Dress, etc.) used by all shops.

The app works on the browser (desktop/mobile) or as a native app (Android/iOS). It has a PWA and is packaged as an Android app (AAB/APK) via Capacitor. The order on the dashboard, updates status: Pending! Measuring!

Three user roles

- Shop creates a bill with amount, advance, and paid/pending; customer views it in Bills.
- Optional: customer requests a price quote before ordering; shop responds from Price Requests.

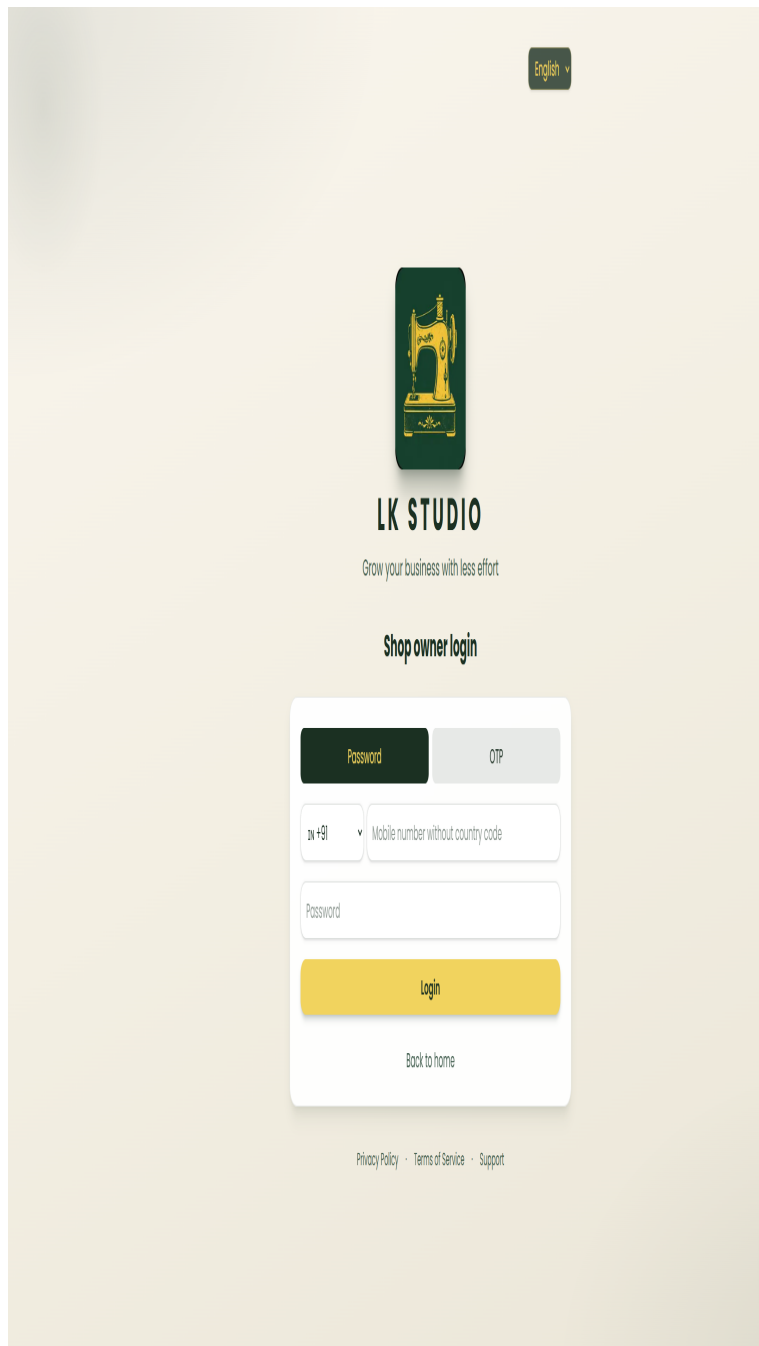

Role		
Admin catalog workflow (shared design)		
Admin	LK Studio team	Catalog upload, shop oversight, platform
Shop	Tailor / boutique owner	Orders, bills, own designs, customer
Customer	Unassigned, tick designs, assigned Small / Medium / Big (or Blouses / Hand sleeves for blouse/dress),	

- Assigned designs appear in customer and shop catalog views; unassigned stay admin-only.

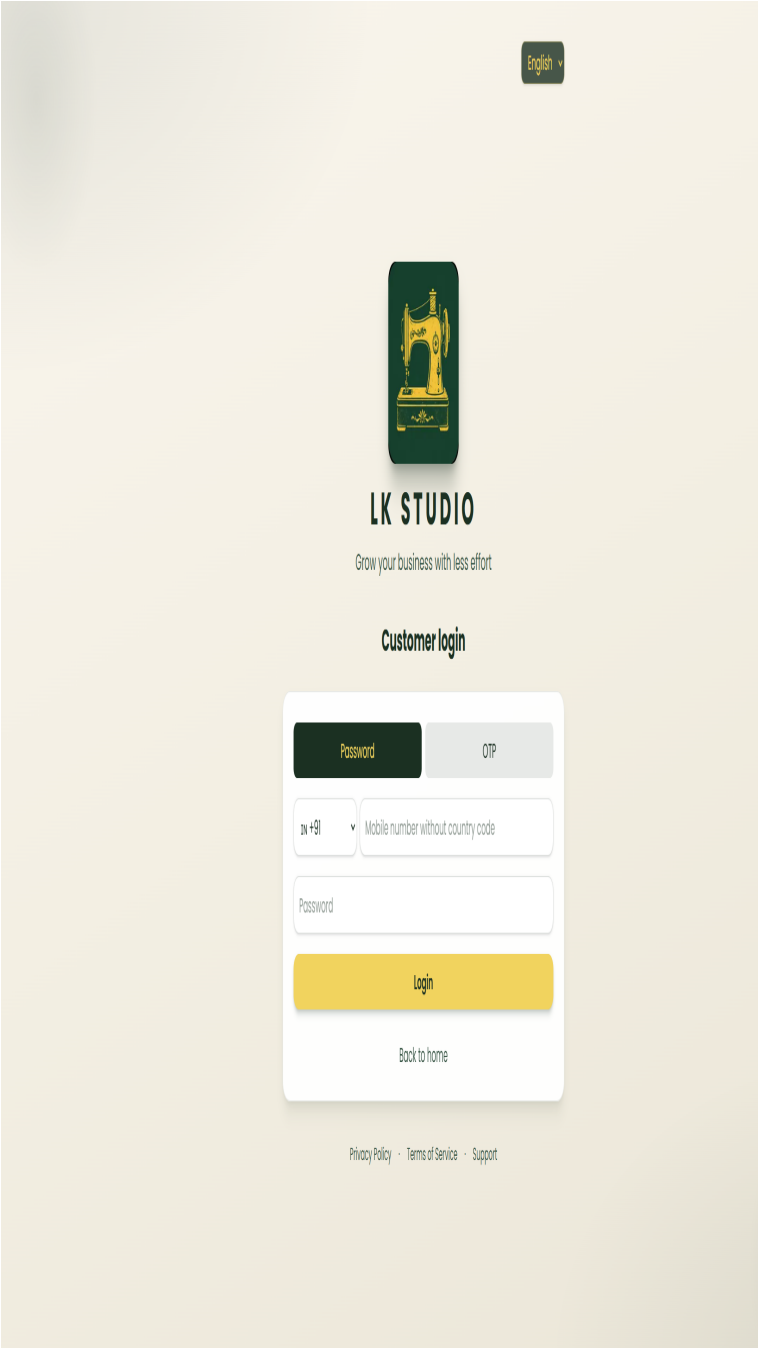

Screenshots

Key screens from production

Home — Register, Shop login, Customer login

Shop login — Mobile number + password / OTP

Admin features

- Batch upload bulk (Photos, PDF, images, vector art, drawings, etc) by a user, (one (1) at a time).
- Bulk upload catalog, specify the designs by its category (Maggam, Embroidery, Blouse, etc). part .
- Manage designs in detail pages with detailed descriptions, measurements and photos.
- Batch upload designs, add image, PDF (if applicable), PDF file, design, Dress model, Children's wear, Stitched design, fashion design, and dress, tops, etc, (also) WhatsApp/Instagram/UPI ID & QR.
- Reports, earnings, subscription, etc, page to PDF.
- Sample on Eid, Day, Festival, etc, with a demo/production).
- Workers, price requests, customer favorites.

Demo accounts & URLs

Role		
Admin	https://lk-studio-1.onrender.com/login/ad	lkstudio123
Shop Admin	/login/shop · 9876543210	demo123
Customer Demo	/login/customer · 9876543219	demo123

- Next.js 15 (App Router) — React 19, TypeScript
- Tailwind CSS 4 — responsive mobile-first
- i18next — English, Telugu, Hindi
- Lucide React — icons
- html2canvas + jsPDF — client-side PDF (e.g. earnings reports)
- Capacitor 6 — Android native shell (camera, geolocation, share, filesystem)
- PWA manifest — Add to Home Screen on mobile browsers

Order status flow

Pending ! Measuring ! Stitching ! Ready ! Delivered (or Cancelled)

- Next.js Route Handlers (API routes under src/app/api/)
- Prisma ORM 6 — PostgreSQL (Supabase in production)
- JWT session cookies (jose) + bcrypt password hashing
- Zod request validation
- nghttp dev anywhere — HTTPS tunnel for phone testing
- Sharp — server-side image normalize/compress on upload
- Razorpay — subscriptions and autopay
- QTP login flow (LoginOtp model) with trusted devices
- pre-release health checks

Storage & infrastructure

- Database: PostgreSQL via Supabase (DATABASE_URL)
- File storage: Cloudflare R2 (default production), optional AWS S3 or Supabase Storage
- Hosting: Render (https://lk-studio-1.onrender.com)
- Android release: AAB built with Capacitor (npm run build:aab:release)

Security & legal

- Role-based access: SHOP, CUSTOMER, ADMIN
- Session versioning and secure cookies in production
- Terms include shop stitched-design catalog license for LK Studio marketing use
- Privacy and terms pages at /terms and /privacy
